(54) Title: DRINK CONTAINER HOLDING APPARATUS

(57) Abstract: ABSTRACT DRINK
CONTAINER HOLDING APPARATUS
A drink container holding apparatus
includes an object attachment device
(40) including a holder engagement
means (5), and a drink container holder
(31) including attachment device
engagement means (30) to engage with
the holder engagement means (5). The
holder engagement means (5) and the
attachment device engagement means
(30) allow relative angular movement
between the object attachment device
(40) and the holder (31) in a selected
plane. The holder (31) and the object
attachment device (40) can be engaged
or disengaged by orientating the
holder engagement means (5) and
the attachment device engagement
means (30) in a pre-determined relative
angular disposition in the selected
plane, and moving the attachment device
engagement means (30) and holder
engagement means (5) relative to each
other in a direction perpendicular to the
selected plane. To be accompanied by
